

Single linkage: $dist(C, C') = \min_{x \in C, y \in C'} d(x, y)$

Average linkage: $dist(C, C') = \frac{\sum_{x \in C, y \in C'} d(x, y)}{|C| \cdot |C'|}$

Complete linkage: $dist(C, C') = \max_{x \in C, y \in C'} d(x, y)$
